

Evolution Mining

Macquarie Australia Conference

5 May 2016

Lawrie Conway – Finance Director and CFO

Forward looking statement

- These materials prepared by Evolution Mining Limited (or “the Company”) include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.
- Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.
- Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.
- Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
- *All US dollar values in this presentation are calculated using the March 2016 quarter average AUD:USD exchange rate of \$0.7215 unless otherwise stated.*

Evolution Mining overview

ASX Code	EVN
Shares outstanding	1,468M
Market capitalisation¹	A\$3,110M
Average daily share turnover	~A\$20M
Cash²	A\$20M
Debt²	A\$370M
Forward sales (Apr-16 to Jun-20)	795,688oz at A\$1,620/oz
Dividend policy (Six dividends declared since Feb-13)	2% of revenue
Major shareholders	La Mancha 30%, Van Eck 7%

1. Based on a share price of A\$2.12 per share on 3 May 2016

2. As at 30 April 2016. Debt represents long term debt excluding leases

3. Includes C1 cash cost plus royalty expense, sustaining capital, general corporate and administration expense.

Australian gold mining's renaissance

■ Australia:

- World's second largest gold producer
- First world jurisdiction
- Excellent operating environment
- High-quality workforce
- Rapidly declining cost base
- Low A\$
- **Record cash margins**

- Australian listed gold companies make up only 11.2% of the Van Eck GDX Gold Miners Index (up from 8.0% on 30 June 2015)
- Since April 2013 ~23% of Australia's annual gold production (2Moz p.a.) has changed ownership
- Emerging mid-tier sector providing attractive investment opportunities

2015 Gold production by country

Rank	Country	Gold production 2015E (metric tonnes)
1	China	457
2	Australia	277
3	Russia	256
4	United States	214
5	Peru	173
6	Canada	152

2015 Estimates. Source: GFMS, Thomson Reuters, Evolution Mining

Australian gold assets under new ownership

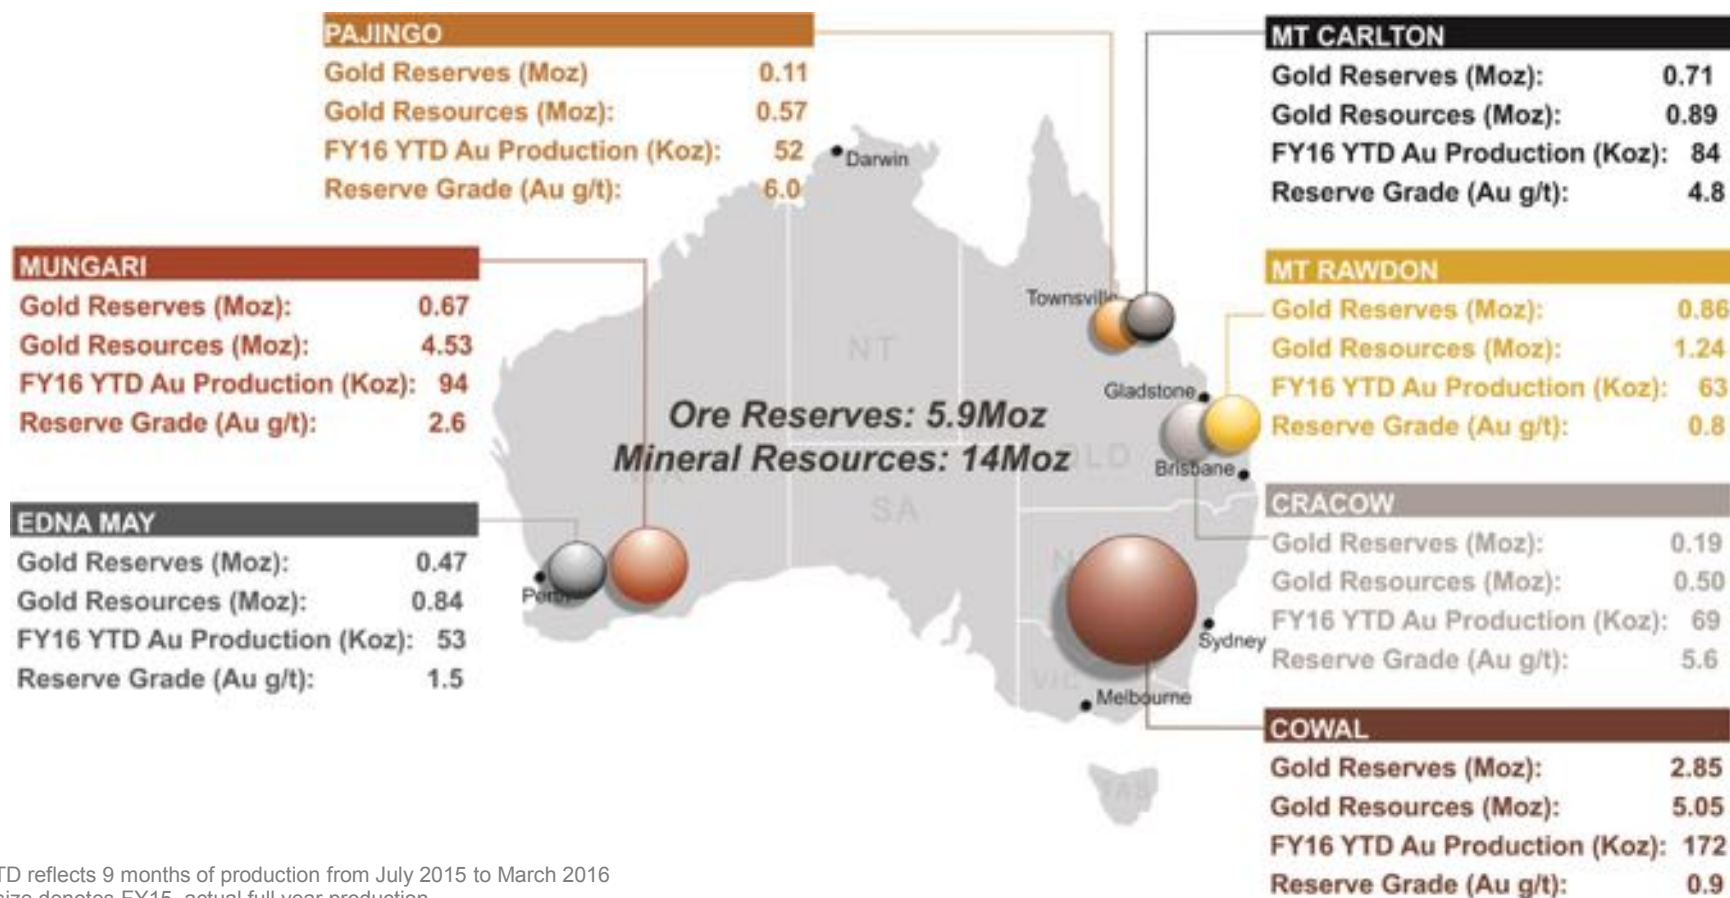

Source: Evolution Mining

Australia's 2nd largest gold miner

- Diversified, 100% owned portfolio providing:
 - consistent, reliable production
 - attractive organic growth opportunities

FY16 YTD reflects 9 months of production from July 2015 to March 2016

Bubble size denotes FY15 actual full year production

Mineral Resources are reported inclusive of Ore Reserves

Mineral Resources and Ore Reserve footnotes are provided on slides 18 and 19 of this presentation

Low cost production

- Declining cost base the result of:
 - upgraded asset quality
 - cost reductions
 - productivity gains
- Evolution is now in the lowest cost quartile of global producers

We act like owners

Accessing additional ounces (Pajingo)

Our team identified an opportunity to explore new ways to safely and economically access the potential ounces in an area previously thought to be uneconomic, generating revenue of ~A\$1 million by mining an additional +950 ounces that were not in the original mine plan

Cheaper and longer life pastefill paddles (Mungari)

Our operators in the Frog's Leg underground pastefill team halved the cost of the paddles required for mixing the paste by identifying and trialling a cast alternative which also delivered four times longer life
Benefit: Annualised saving of A\$250,000

Weir Warman 150EE-MCR cyclone feed pump

Cheaper and more effective cyclone feed pumps (Cracow)

Our Engineering and Maintenance team member identified an alternative cyclone feed pump (Weir Warman 150EE-MCR) and negotiated a trial to test the pump for \$1 – with the balance due only if the pump exceeded the run time and performance of the current pump – which it did.
Benefit: Cost savings of up to A\$200,000 on purchase, A\$69,000 in reduced cost of stock holding and reduced labour hours for rebuilds up to 96 hours per year and less power (Kw) for the same performance duty

Reducing stoppage time by re-engineering broken bolts (Mt Rawdon)

Our Maintenance Supervisor, reduced stoppage time in the processing plant by up to 20 hours (equivalent to ~A\$300,000) by using an innovative way to fix broken bolts on a critical piece of equipment

Whiskers fitted to rock breaker

Whiskers fitted to the EX123 rock breaker (Mt Carlton)

Our open pit supervisor and Trainer and Assessor's idea to fabricate and install sacrificial whiskers to the sides of the rock breaker to protect the hydraulic hoses from contacting the sides of the ROM during ROM bin de-bridging and eliminate the need for a spotter
Benefit: Annualised saving of A\$240,000

Expanding EBITDA margins

- Group EBITDA margins continue to expand

Group EBITDA Margin

Site EBITDA Margin

Strong cash flow momentum

- Mine cash flow post all sustaining and major capital expenditure continues to show strong positive momentum
- March 2016 quarter net mine cash flow of A\$105.8 million
- Cash generated primarily directed towards A\$237.0 million in early debt repayments in the last eight months
- FY16+ cash flow accelerating due to:
 - Cowal and Mungari (increased volume and lower cost)
 - Ongoing focus on group wide cost reductions
 - Favorable A\$ gold price

Net Mine Cash Flow (A\$M)

March 2016 quarter highlights

- Record quarterly Group gold production of 208,963 ounces at an AISC of A\$1,015/oz
- Record quarterly production from Cowal of 70,803 ounces at an AISC of A\$757/oz
- Record operating mine cash flow of A\$154.9 million and net mine cash flow, post all sustaining and major capital, of A\$105.8 million
- A total of A\$80.0 million of early debt repayments made during the quarter
- Interim dividend cash payment of A\$12.1 million (net of DRP)

FY16 Debt Repayments (A\$M) and Leverage Ratio

Term Loan Facility Amortisation Profile (A\$M)

A cornerstone asset

- One of Australia's most attractive gold assets
- FY16 attributable production guidance of 225 – 240koz Au at AISC of A\$800 – A\$850/oz
- Strong net cash generation of A\$121.5 million in first eight months of ownership
- Excellent exploration potential with recent drill program at Galway and Regal prospects returning an intersection of:
 - 73m (25m etw) grading 4.79g/t from 207m in hole E46D3238¹
- Reserves increased by 83% since Cowal was acquired by Evolution in July 2015
- Mineral Resources: 5.1Moz Au²
- Ore Reserves: 2.9Moz Au²

Cowal gold mineralisation, recent drilling and E42 open pit outline

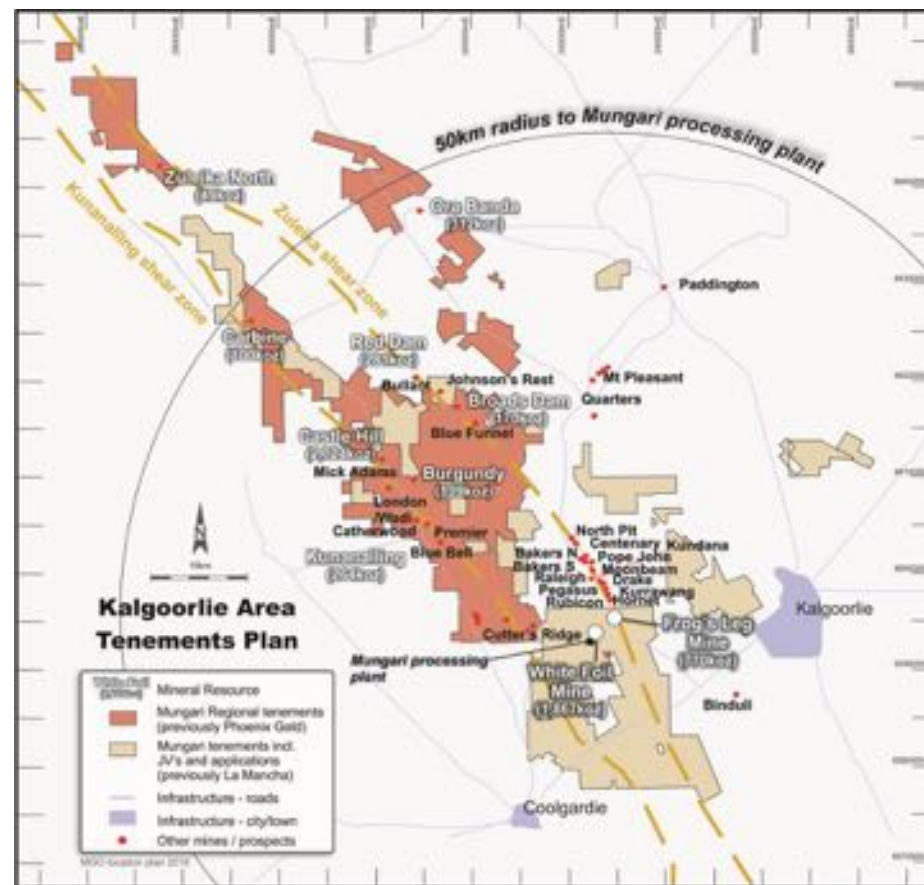

1. This information is extracted from the release entitled "September 2015 Quarterly Report" released on 23 October 2015. The reported interval is a downhole width as true widths are not currently known. An estimated true width ("etw") is provided. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Report

2. Further details on the Cowal Mineral Resources and Mineral Reserves are appended to this presentation and full details are provided in the report entitled "Annual Mineral Resources and Ore Reserves Statement" released on 21 April 2016 and is available to view on www.evolutionmining.com.au

Mungari

Large foothold in a world-class district

- Located 20km directly west of Kalgoorlie
 - Frog's Leg underground & White Foil open pit
 - 1.6Mtpa Mungari CIL processing plant
 - Under-explored ~920 km² tenement package
- FY16 attributable production guidance of 120 – 135koz Au at an AISC of A\$920 – A\$1,020/oz
- Net mine cash flow of A\$61.4 million in first seven months of ownership
- Potential new discovery at Johnson's Rest with best intersection:
 - 10m (8.66m etw) grading 22.32g/t from 118m
- Recent resource definition drilling has extended mineralisation at Frog's Leg and White Foil beyond December 2015 Ore Reserve limits
- Mineral Resources: 4.5Moz Au¹
- Ore Reserves: 0.7Moz Au¹

Location of Mungari including recently acquired Phoenix Gold tenements

Delivering exceptional results

- One of the highest grade open pit gold mines in the world
- Developed by Evolution; commissioned in 2013
- FY16 production guidance of 100 – 105 koz Au at AISC of A\$760 – A\$810/oz
- FY16 YTD net mine cash flow of A\$63.8 million
- Consistent positive grade reconciliation
 - March 2016 YTD mined grade of 6.4g/t Au vs reserve grade of 4.8g/t Au
- High level of confidence in mine life extensions
- Recent high-grade intersections¹ from drill program targeting mine life extension including:
 - 10m (5.7m etw) grading 22.0g/t from 69m in hole HC15DD1147
- Mineral Resources: 0.9Moz Au²
- Ore Reserves: 0.7Moz Au²

Mt Carlton alteration zonation model, high-grade feeder zones and interpreted trends (hot pink), and V2 pit design

1. This information is extracted from the release entitled "December 2015 Quarterly Report" released on 27 January 2016. The reported interval is a downhole width as true widths are not currently known. An estimated true width ("etw") is provided. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Report
2. See Mt Carlton Mineral Resources and Ore Reserves appended to this presentation for details on Reserve and Resource estimates

A consistent performer

- Delivered consistent, reliable performance since Evolution's inception in 2011
- Mt Rawdon has successfully replaced all mining depletion under Evolution ownership (*November 2011 Ore Reserves: 0.9Moz Au*)
- Access to higher grade ore at the base of the pit is expected in the June 2016 quarter putting Mt Rawdon back on track after recent weather-related underperformance
- Improved cash generation in coming years as accelerated stripping nears completion
- FY16 YTD net mine cash flow of A\$6.3 million
- Mineral Resources: 1.2Moz Au¹
- Ore Reserves: 0.9Moz Au¹

Mt Rawdon Open Pit

1. See Mt Rawdon Mineral Resources and Ore Reserves appended to this presentation for details on Reserve and Resource estimates

Operations update

Edna May

- Mining currently focused on Stage 2 cutback
- Access to higher gold ore grades expected in the June 2016 quarter
- Phase 1 development of the Edna May underground approved (A\$16.0M) targeting an initial resource of 200koz gold
- FY16 YTD net mine cash flow of A\$1.2M during capital intensive period

Cracow

- Minimising dilution to achieve higher grades
- Track record of replacing depleted ounces
- Recent resource definition drilling at Coronation confirmed depth extension of high-grade mineralisation. Best intersection: 4.7m (4.2m etw) grading 50.91g/t Au
- FY16 YTD net mine cash flow of A\$33.5M

Pajingo

- Consistently generating positive cash flow
- Recent addition to Resources of 98koz from Camembert orebody
- Recent resource definition drilling at Anne and Janet B delivered encouraging intersections including: 15.4m (12.0m etw) grading 7.4g/t Au
- FY16 YTD net mine cash flow of A\$21.0M

Delivering on growth

Old Evolution

FY15A production (koz)

New Evolution

FY16E production guidance midpoint (koz)

Group production

Executing a clear and sound strategy

First world jurisdiction	<ul style="list-style-type: none">▪ Operating in Australia▪ Gold miners currently experiencing strong tailwinds
Mid-tier	<ul style="list-style-type: none">▪ 6 – 8 asset portfolio to ensure focus is maintained
Low cost	<ul style="list-style-type: none">▪ Driving down costs and improving productivity▪ Upgrading the quality of the portfolio
Reliability	<ul style="list-style-type: none">▪ Continued delivery on production and cost guidance▪ Optimising diversified open pit and underground asset base
Organic growth	<ul style="list-style-type: none">▪ Investing in near mine exploration
M&A	<ul style="list-style-type: none">▪ Logical, opportunistic, value accretive acquisitions
Superior returns	<ul style="list-style-type: none">▪ Balance sheet strength▪ Capital growth and consistent semi-annual dividends
