FORWARD LOOKING STATEMENT

These materials prepared by Evolution Mining Limited (or “the Company”) include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

CLEAR AND CONSISTENT STRATEGY

Focused portfolio of 6 – 8 assets

Upgrade portfolio asset quality

Reduce costs and grow free cash flow per share

Extend reserve life

Deliver consistent returns to shareholders

A globally relevant mid-tier gold producer

EBITDA MARGINS

- H1 FY19 Group EBITDA margin of 48%
- Improved portfolio quality in recent years
- Longer life assets generating highest margins

Site FY19 H1 EBITDA margin

RETURN ON INVESTMENT

- Generating an appropriate return on investment a primary focus of the business
- Longest life assets generating highest returns
- Assets generating returns of up to 23% per annum
- Mt Carlton and Cracow have already fully repaid all invested capital

(1) Average annual ROIC under Evolution ownership

(2) Indicative reserve life based on FY19 production guidance mid-point

FINANCIAL POSITION

- Balance sheet liquidity of A\$606M
 - Cash balance: A\$256M
 - Undrawn revolver: A\$350M available
- Net bank debt position of A\$74M
- Since FY15:
 - Debt repayments: A\$879M
 - Dividend payments: A\$357M
- Excess cash to be returned to shareholders with debt now largely repaid
- Hedge book: 437,500oz at A\$1,826/oz

Dividends paid and debt repayments (A\$M)

COWAL

- Sustainable, reliable, low cost production
- Delivering a pathway to produce >300kozpa
- Exploration success delivering transformational organic growth

QUEENSLAND EXPLORATION

Drummond Exploration Project (Evolution earning 80%)

- Early-stage epithermal (low-sulphidation) vein project (520km²)

Connors Arc Exploration Project (Evolution 100%)

- Large land package (3,500km²) prospective for low (e.g. Cracow) and high sulphidation (e.g. Mt Carlton) epithermal deposits

DISCOVERY STRATEGY

FY19 Discovery Guidance A\$40-55M

Approach: Upgrade the pipeline

People

- New, invigorated world class team
- Fostering a discovery culture

Tactics

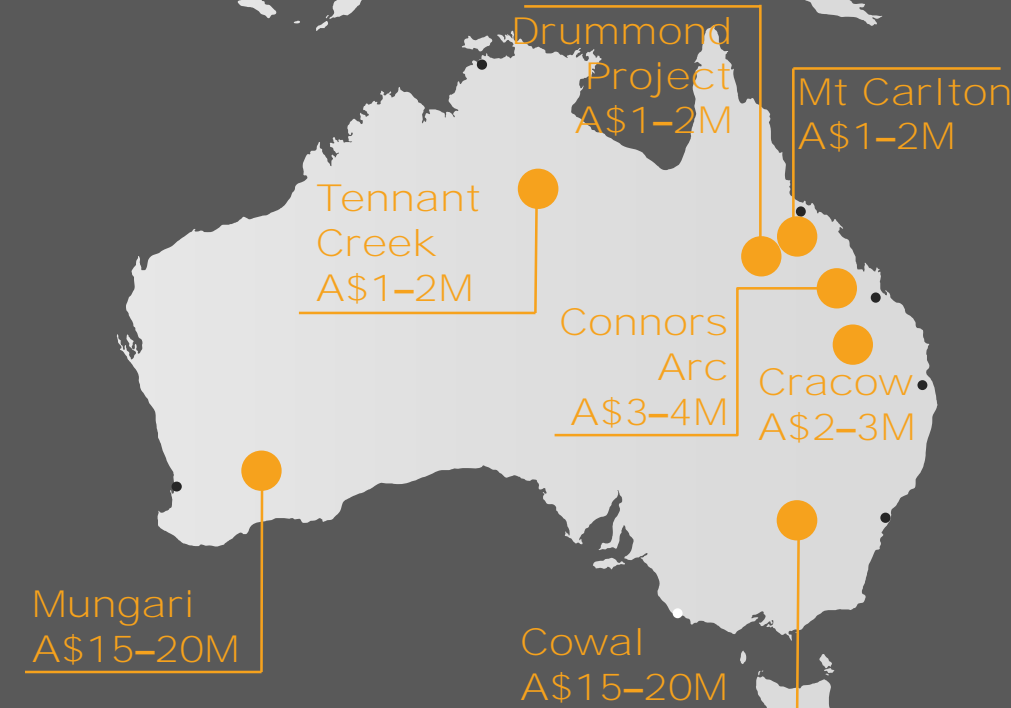

- Build land positions in key camps
- 3D architecture and footprint vectoring

Deposit Styles

- Epithermal – low/intermediate & high sulphidation
- Orogenic lode gold

Geographic Focus

- Emphasis in Australia
- Evaluating North America

FY19 Resource Definition Drilling A\$10-15M

GENERATING SUPERIOR FINANCIAL RETURNS

Global leader in low cost production

Strong track record in creating value

Reputation for reliability and transparency

Discovery team delivering transformational organic growth

Shareholders rewarded through dividends and capital growth

PRODUCTION TARGET

Cautionary statement concerning the proportion of Exploration Targets¹

Of Evolution's Production Outlook, 2% is comprised of Exploration Targets. The potential quantity and grade of this exploration target is conceptual in nature and there has been insufficient exploration to determine a Mineral Resource and there is no certainty that further exploration work will result in the determination of Mineral Resources or that production target itself will be realised.

Cautionary statement concerning the proportion of Inferred Mineral Resources

There is a low level of geological confidence associated with Inferred Mineral Resources and there is no certainty that further exploration work will result in the determination of Indicated Mineral Resources or that the production target itself will be realised.

Material Assumptions

The material assumptions on which the Production Target is based are presented in ASX release "Annual Mineral Resources and Ore Reserves Statement" released to the ASX on 19 April 2018 and available to view at www.evolutionmining.com.au. The material assumptions upon which on which the forecast financial information is based are:

Silver	A\$20/oz
Copper	A\$8,800/t
Diesel	A\$110/bbl

Competent Persons Statement

The estimated Mineral Resources and Ore Reserves underpinning the Production Target and Exploration Target have been prepared by Competent Persons in accordance with the requirements in Appendix 5A (JORC Code). The Company confirms that the form and context in which the Competent Persons findings are presented have not been materially modified from the original market announcement.

Relevant proportions of Mineral Resources and Ore Reserves underpinning the Production Target

The Production Target comprises 96.5% Probable Ore Reserves, 1.5% Inferred Mineral Resources and 2% Exploration Targets.

This information is extracted from the ASX release entitled "Annual Mineral Resources and Ore Reserves Statement" released to the ASX on 17 April 2019. Full details of the Ernest Henry Mineral Resources and Ore Reserves are provided in the report entitled "Glencore Resources and Reserves as at 31 December 2018" released 1 February 2019 and available to view at www.glencore.com. The Company confirms that it is not aware of any new information or data that materially affects the information included in the Report and that all material assumptions and parameters underpinning the estimates in the Report continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcement. Ernest Henry Resource is reported on an 81.5% basis for gold and 36.7% for copper (Evolution Mining has rights to 100% of the revenue from future gold production and 30% of future copper and silver produced from an agreed life of mine area and 49% of future gold, copper and silver produced from the Ernest Henry Resource outside the agreed life of mine area). Apportioning of the resource into the specific rights does not constitute a material change to the reported figures. Ernest Henry Reserve is reported on a 100% basis for gold and 30% for copper.

M&A STRATEGY

- The rules are simple:
 - Improve the quality of the portfolio
 - Logical
 - Value accretive
 - Opportunistic
- But delivery is not simple. It requires the ability to:
 - Recognise the opportunity
 - Execute the transaction
 - Integrate acquired assets

Improve portfolio quality

Remain disciplined
