COWAL SITE VISIT

JOHN PENHALL – GENERAL MANAGER

31 March 2021

ACKNOWLEDGEMENT OF COUNTRY

We would like to acknowledge the **Wiradjuri** people who are the Traditional Custodians of the Land.

We would also like to pay respect to the Elders both past and present of the **Wiradjuri** Nation and extend that respect to other Indigenous Australians who are present.

“We are all visitors to this time, this place. We are just passing through. Our purpose here is to observe, to learn, to grow, to love... and then we return home.”

Aboriginal Proverb

FORWARD LOOKING STATEMENT

These materials prepared by Evolution Mining Limited (or “the Company”) include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

This presentation has been approved for release by Evolution’s Board of Directors.

AUD:USD exchange rate assumption of 0.75 used throughout this presentation unless stated otherwise.

PREMIER GLOBAL MID-TIER GOLD COMPANY

BEST IN CLASS FINANCIAL RETURNS

EBITDA margin¹ of 56%
Sector leading cash flow per ounce
Dividends per ounce² of A\$341

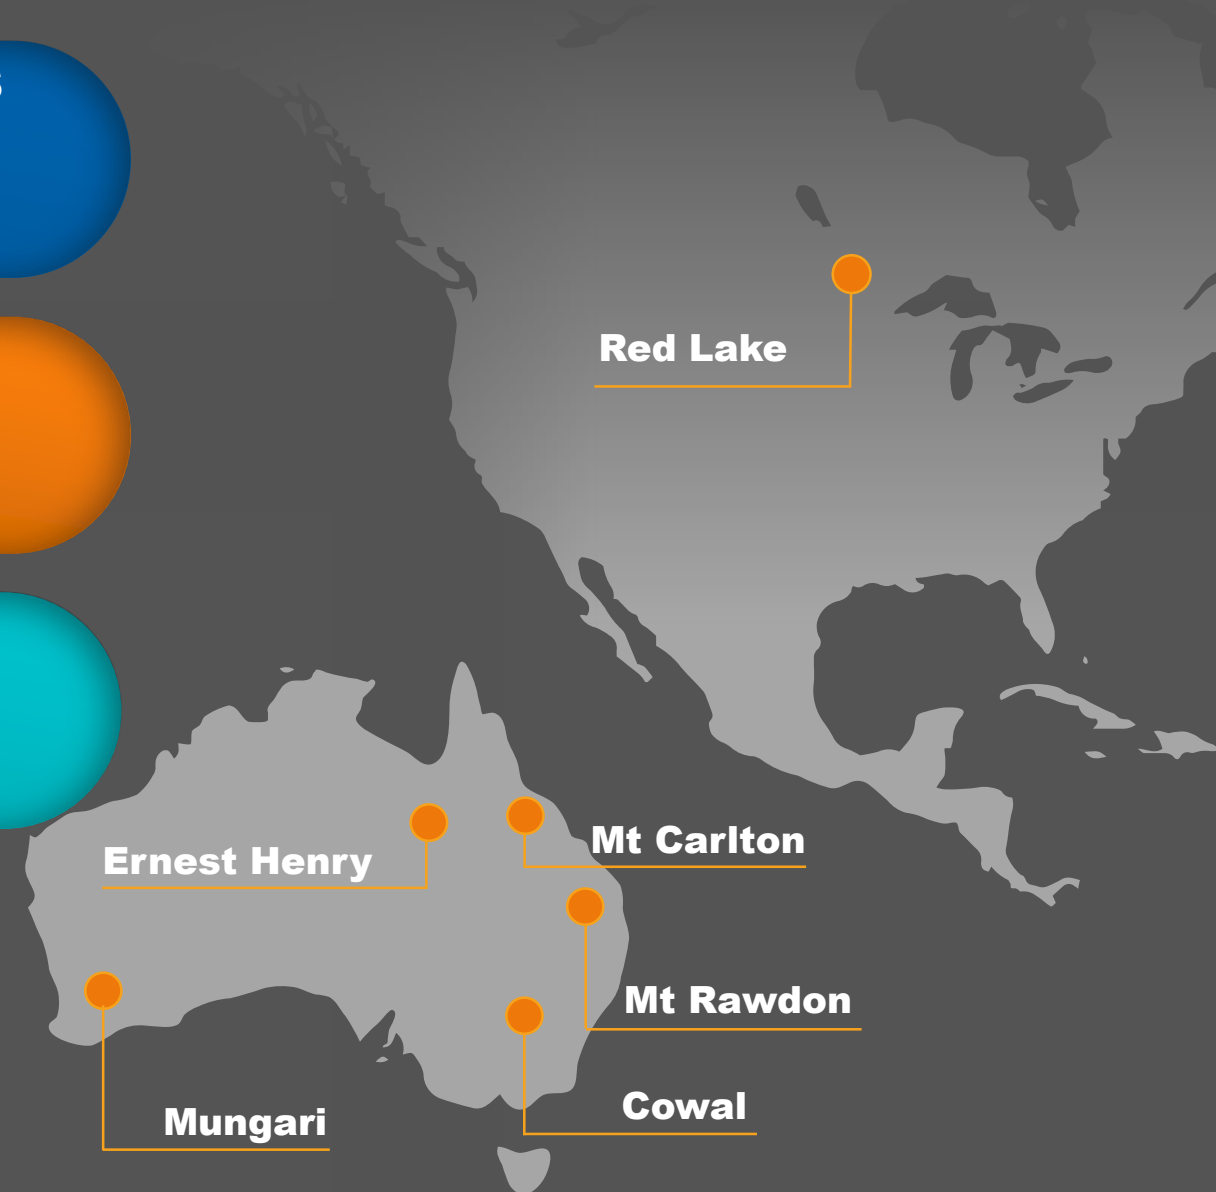

HIGH QUALITY PORTFOLIO

Long-life, low-cost cornerstone operations
Tier 1 jurisdictions
Focused portfolio of 6 – 8 assets

ATTRACTIVE GROWTH PROFILE

Cowal production objective 350kozpa
Red Lake production objective 300 – 500kozpa
Ernest Henry extensions below 1,200mRL

SUSTAINABILITY PRINCIPLES

The objective of our sustainability efforts is to deliver long-term stakeholder **value** through **safe**, low-cost gold production in an **environmentally** and socially **responsible** manner

Be an employer of choice attracting the most talented people and foster a **safe, diverse** and **inclusive** workplace

Demonstrate robust **risk management** and **safety leadership**

Contribute positively to local, regional and national sustainability efforts by achieving an outstanding level of **environmental** stewardship

Actively manage **climate related risks** and opportunities including improving energy efficiency and the responsible management of water

Protect and enhance our reputation as a **trusted partner** and provide **community** benefits that endure beyond the life of our mines

Advance the outcomes for **indigenous** peoples and protect their **Cultural Heritage**

Respect the **human rights** of all our stakeholders

Be transparent at all levels of **Corporate Governance**, comply with applicable laws & regulations and operate at the **highest standards** of financial and ethical behaviour

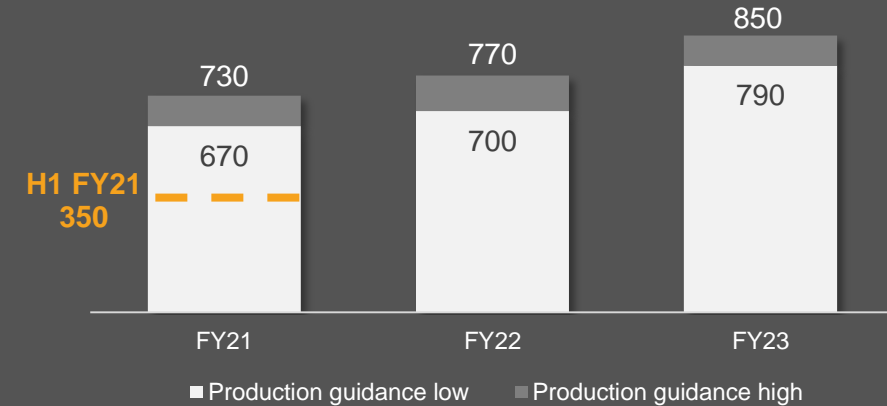

Relentlessly drive for **operational excellence** through an **innovative** culture and **inspired people** delivering to plan

EVOLUTION SNAPSHOT

ASX CODE	EVN
MARKET CAPITALISATION ⁽¹⁾	A\$7.4B
AVERAGE DAILY TURNOVER⁽²⁾	A\$50M
NET DEBT⁽³⁾	A\$87M
DIVIDEND POLICY	Payout of 50% of free cash flow
GOLD MINERAL RESOURCES⁽⁴⁾	26.4Moz
GOLD ORE RESERVES⁽⁴⁾	9.9Moz
RESERVE PRICE ASSUMPTION	A\$1,450/oz
FY21 PRODUCTION GUIDANCE	670 – 730koz
FY21 AISC GUIDANCE	A\$1,240 – A\$1,300/oz

Production increasing by 17% over next two years (koz)

Declining AISC profile (A\$/oz)

(1) Based on share price of A\$4.30 per share on 23 March 2021

(2) Average daily share turnover for one month through to 23 March 2021

(3) As at 31 December 2020. Bank debt of A\$525 million less cash of A\$438 million

(4) See the Appendix of this presentation for further details on Mineral Resources and Ore Reserves stated in this presentation

COWAL – A CORNERSTONE ASSET

Building towards sustainable, reliable, low-cost production of 350,000 ounces per annum

Continued growth opportunities from high-grade underground ore body which remains open

Open pit Ore Reserves provide long-term production base

Low-cost processing plant (permitted to 9.8Mtpa)

Potential for new discoveries

Supportive stakeholders, community and government

COWAL – A WORLD CLASS DEPOSIT

Location	<i>Approximately 38km north-east of West Wyalong in New South Wales, Australia</i>
Property	<i>Mining Lease (ML 1535 & ML1791) encompasses an area of 2,886 hectares and lies within Evolution’s total property holding of ~14,200 hectares</i>
Commencement	<i>Mining commenced 2005 and processing 2006</i>
Approval	<i>Operation currently approved until 2032</i>
Mining method	<i>Conventional open pit</i>
	<i>Owner-Miner</i>
Minerals	<i>Gold</i>
Mineralisation type	<i>Structurally hosted epithermal to mesothermal sheeted veins and shear hosted lodes</i>
Tenement package	<i>1,358km²</i>
Process method	<i>Grinding, gravity, flotation and cyanide leaching circuits</i>
Plant capacity	<i>~9Mtpa – permitted to 9.8Mtpa</i>

Ore Reserves	<i>137.9Mt at 1.04g/t Au for 4.6Moz Au</i>
Mineral Resources	<i>290.2Mt at 1.04g/t Au for 9.7Moz Au</i>
Access	<i>Sealed road connecting to West Wyalong and major regional highways</i>
Power	<i>Grid power supplied to the mine by 132kV transmission line</i>
Workforce	<i>Residential</i>
Employees and contractors	<i>~500</i>
Time roster	<i>7:7, 8:6, 5:2:4:3</i>

VALUE ACCRETION

Evolution acquired Cowal in July 2015

	2015	2020
Ore Reserves	1.6Moz →	4.6Moz
Mineral Resources	3.4Moz →	9.7Moz
Mine life	2024 →	2032+
Plant capacity	7.2Mtpa →	~9.0Mtpa
Gold production		1.3Moz
Net mine cash flow		A\$824M

Sustainable, reliable, low-cost production

SUSTAINABILITY

INTEGRATED INTO EVERYTHING WE DO

- Water Management
 - Increased return water for reuse from Integrated Waste Landform (+20%/day)
 - Saline water to reduce reliance on freshwater resources
- Extreme weather support for the community
- Developing energy and emissions reduction pathways toward net zero
- ~500+ local jobs (>70% reside in region)
- Partnership with Wiradjuri Condobolin Corporation
- Supportive stakeholders, community and government
- A\$18M of NSW Royalties paid in FY20
- Local procurement spend ~A\$37Mpa
- ~5% Indigenous workers, advancing cultural competency
- ~18% female workers
- Diversity and Inclusion focus

- Risk based decision approach supported by policies & standards
- Risk Management framework aligned with Australian and International standards and guidelines
- COVID-19 enhanced business continuity planning
- Strong reporting, investigation and learning culture
- Signatories to the International Cyanide Management Code
- ISO14001 certified
- Integrated Waste Landform (IWL)
- Zero incidents of material harm
- Digitisation of data monitoring
- Increased biodiversity in lake due to good land management
- Developing long-term strategic partnerships assuring cultural heritage with traditional custodians

SUSTAINABILITY – SAFETY & HEALTH

Key initiatives to improve our safety performance

- Lead Indicators
 - 265% increase in hazard reports, ~1,600 safety interactions completed monthly over the past 12 months
- People, Training and Communication
 - Increased workforce training to upskill workforce
 - Health programs – skin checks, flu vaccines, targeted campaigns with monthly newsletters
- Systems
 - Risk framework simplified; new sustainability management database implemented
 - Contractor safety management ramped up to match increased site activity
- Response
 - COVID management successfully embedded into operation
 - Expanded Emergency Response Team (ERT) resources and capability
 - Improved incident investigation quality for improved learnings

Total Recordable Injury Frequency (TRIF) of 5.2

TRIF – The frequency of total recordable injuries per million hours worked. Results shown are based on a 12-month moving average (12MMA)

ERT Training

Resourced Medical Centre

COWAL GROWTH STRATEGY

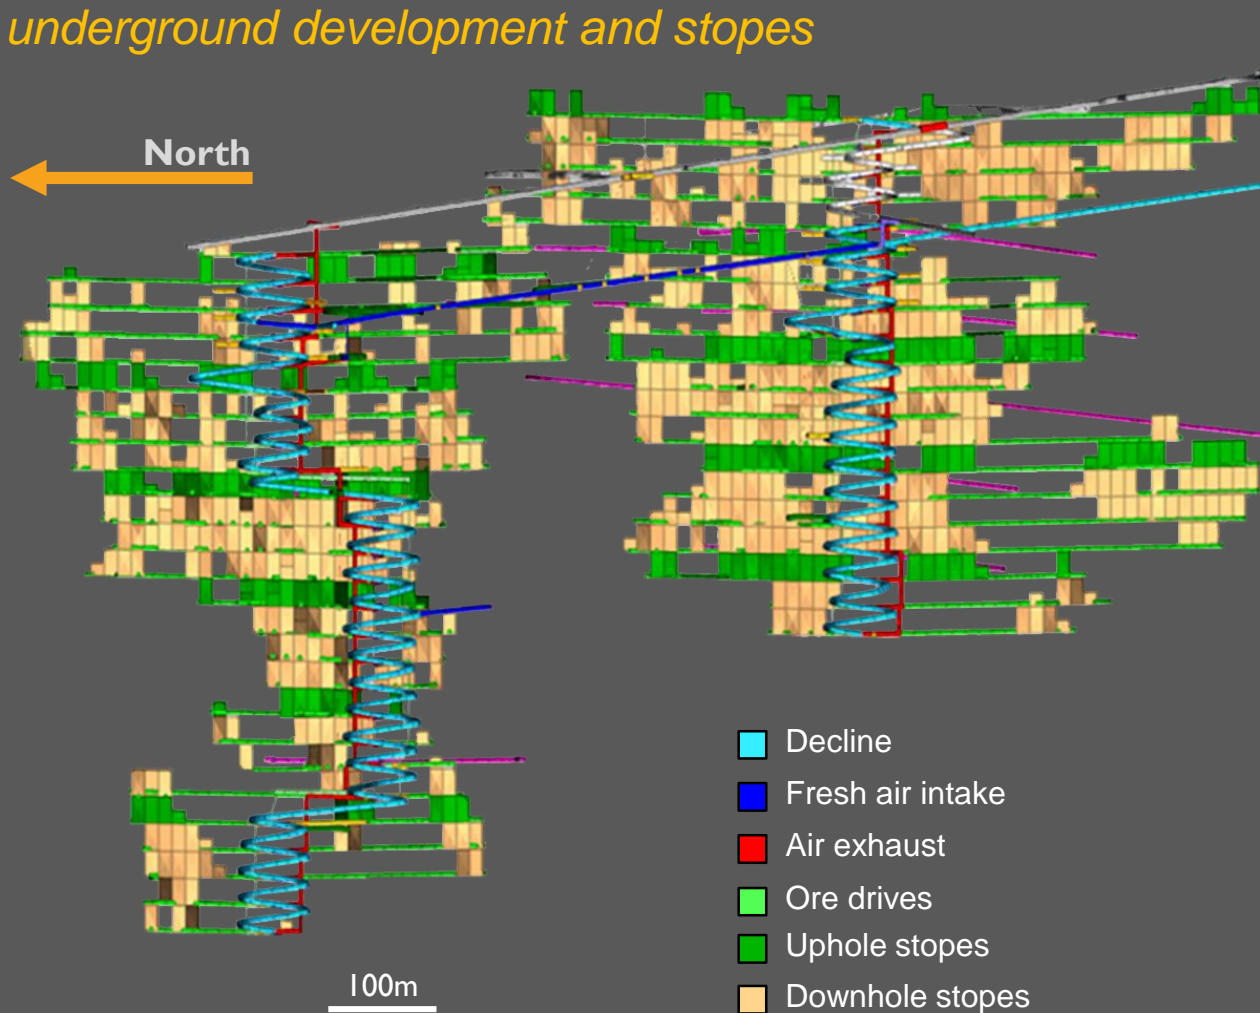

Building towards consistent, reliable, low-cost production for 20+ years

- Underground development – pathway to 350kozpa
 - Underground Feasibility Study underway
 - 3.0Moz Mineral Resource, 1.0Moz Ore Reserve
 - High-grade orebodies open at depth
- Process permitting to 9.8Mtpa for long-term optionality
- Open pits provides long-term base load ore feed
 - Stage H cutback
 - Pre-feasibility study: potential E42 extensions beyond Stage H, E41 and E46 satellite pits
- Continued transformational organic growth driven by discovery
 - World-class gold-copper geologic setting

UNDERGROUND FEASIBILITY STUDY

Feasibility Study Life of Mine design of underground development and stopes

Leveraging opportunity

- Delivered increased Resources and Reserves
- Optimising mine design to prioritise higher grade

VALUE

Progressing design and procurement

- Early contractor involvement in mining and construction design
- Engineering design 30% complete – on track

DEFINITION

Reducing risk

- Geotechnical drilling
- Metallurgical test work
- Execution planning

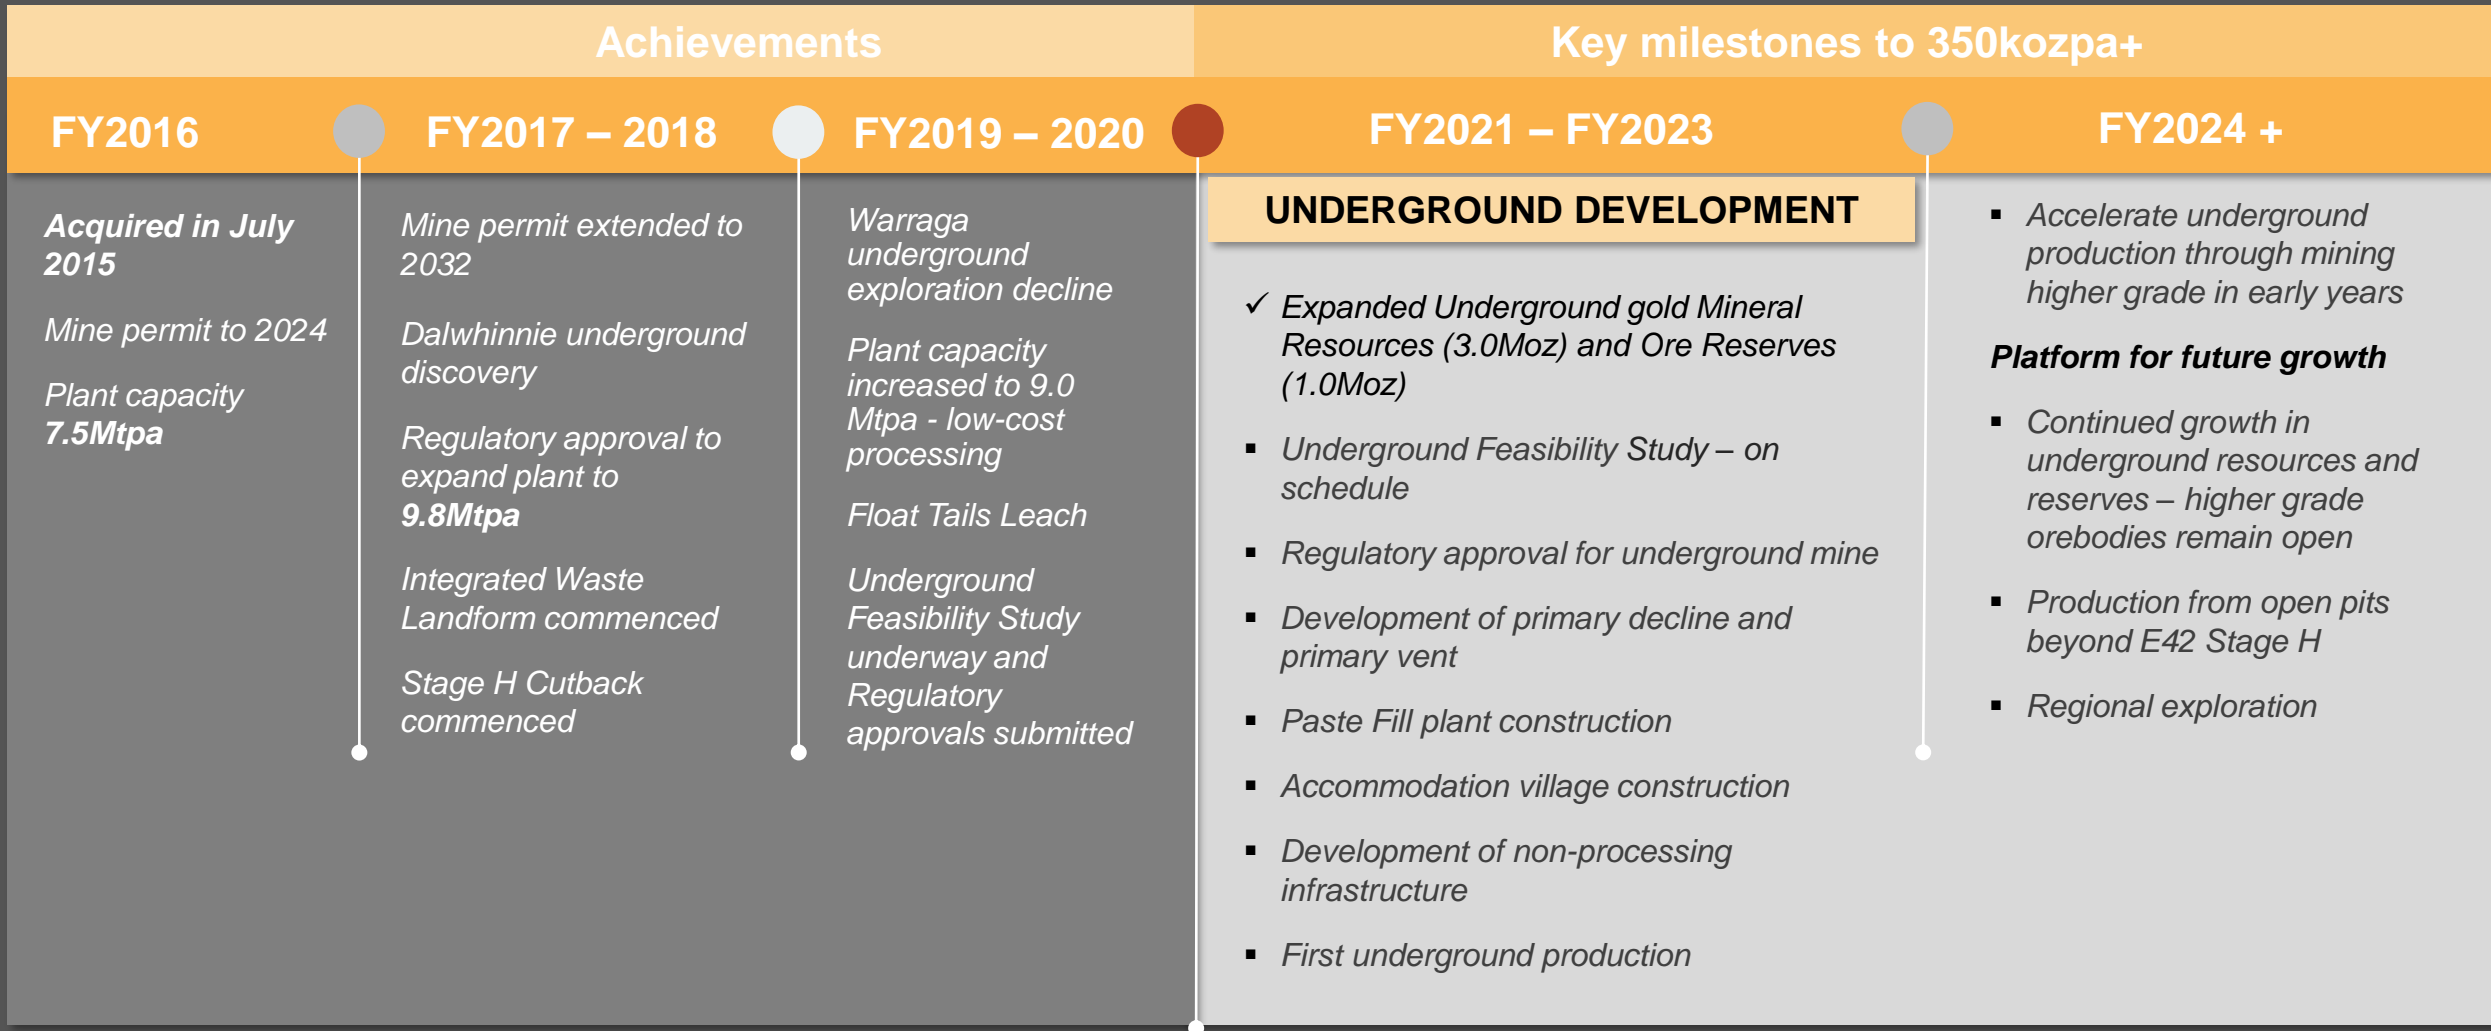

RELIABLE EXECUTION

Progressing permitting

- Low environmental impact
- Mod16, State Significant Development
- Strong community support

LICENCE TO OPERATE

PATHWAY TO >350KOZPA OF LOW-COST PRODUCTION

AVERAGE ANNUAL PRODUCTION ~250KOZ AT AISC A\$880/OZ (US\$660/OZ)

PATHWAY TO INCREASE ANNUAL PRODUCTION TO 350KOZ+

REGIONAL OPPORTUNITY

World class geologic setting for gold and copper-gold deposits

1,358 km² landholding in the Junee-Narromine Belt of the Macquarie Arc

Multiple target styles:

- Epithermal gold deposits (eg E42, GRE46, E41)
- Porphyry copper-gold deposits (Cadia, North Parkes, Marsden)

KEY TAKEAWAYS

Cowal – a cornerstone Evolution operation

Building towards 350kozpa of sustainable, reliable, low-cost gold production

Underground Feasibility Study and permitting progressing well with exploration decline extension underway

Supportive stakeholders and government, strong local community engagement

COWAL SITE LAYOUT

E42 OPEN PIT

LARGE OPEN PIT PROVIDING LONG-TERM ORE BASE LOAD

- **Stage H cutback**
 - Increasing ore volumes and grade mined in the second half of FY21
 - Strip ratio to fall below 1:1 in FY23
 - Equipment strategy review underway – opportunity to rationalise fleet with reducing re-handle
- **Open pit future growth**
 - Pre-feasibility Study underway for E42 beyond Stage H, E41 and E46 satellite pits
 - Scheduled completion end FY21 / early FY22
 - Provides long-term base load ore feed for the operation

MINING FLEET

Haulage/mine trucks

- 20 x Cat 789C Dump Trucks
- 3 x Cat 785C Dump Trucks

Drilling equipment

- 6 x Atlas Copco D65 (Hired)
- 1 x Drill rigs Australia GC600

Dozers

- 5 x CAT D10T Tracked Dozers
- 1 x CAT834H Wheel Dozer

Shovels/excavators/loaders

- 1 x Liebherr 9400 Excavator
- 1 x Liebherr 994B Excavator
- 1 x Liebherr 9200 Excavator
- 1 x Hitachi EX1200 Excavator
- 3 x Cat 992G Loaders

Haul road maintenance equipment

- 2 x Cat 16H Graders
- 1 x Cat 345 Excavator
- 2 x Cat 777D Water Carts

IWL Equipment

- 3 x Hitachi Excavators
- 4 x 777F Caterpillar Haul trucks
- 5 x 745 Caterpillar Articulated Haul trucks
- 2 x Watercarts
- 1 x 992 G Caterpillar Loader
- 4 x Caterpillar Track dozers
- 4 X Rollers
- 1 x 14M Caterpillar Grader

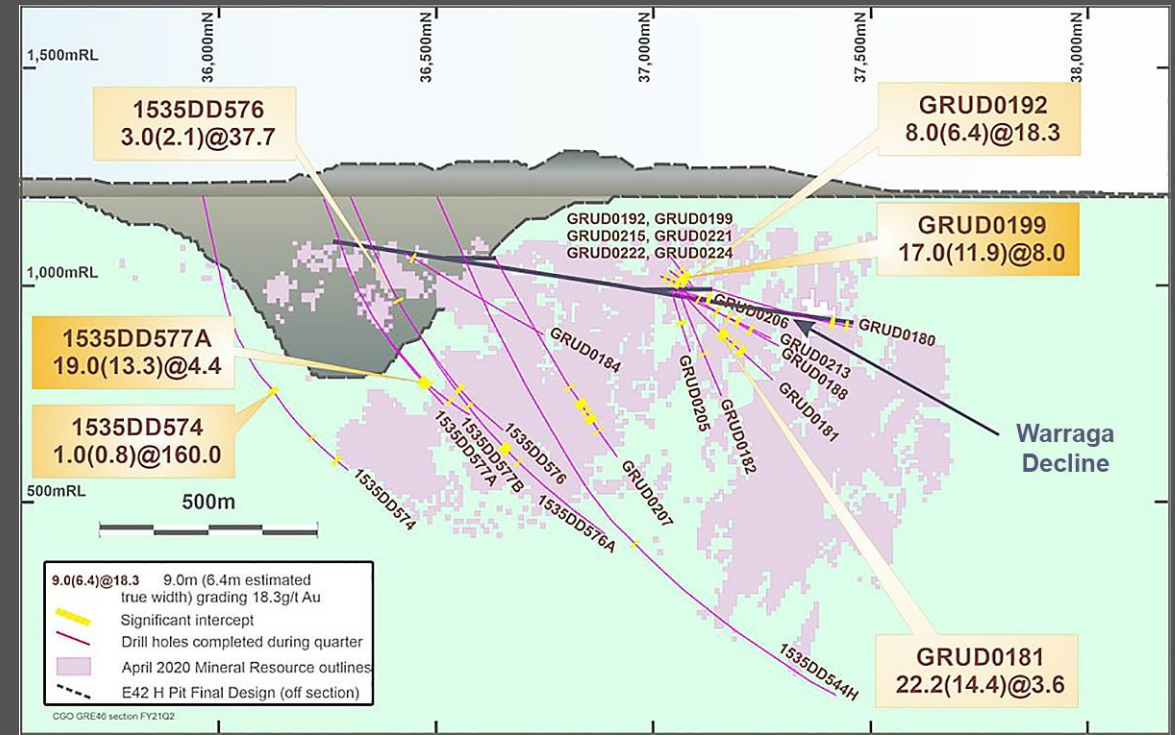

RESOURCE AND RESERVE EXPANSION

- Investment in drilling expected to continue to grow Mineral Resources and Ore Reserves

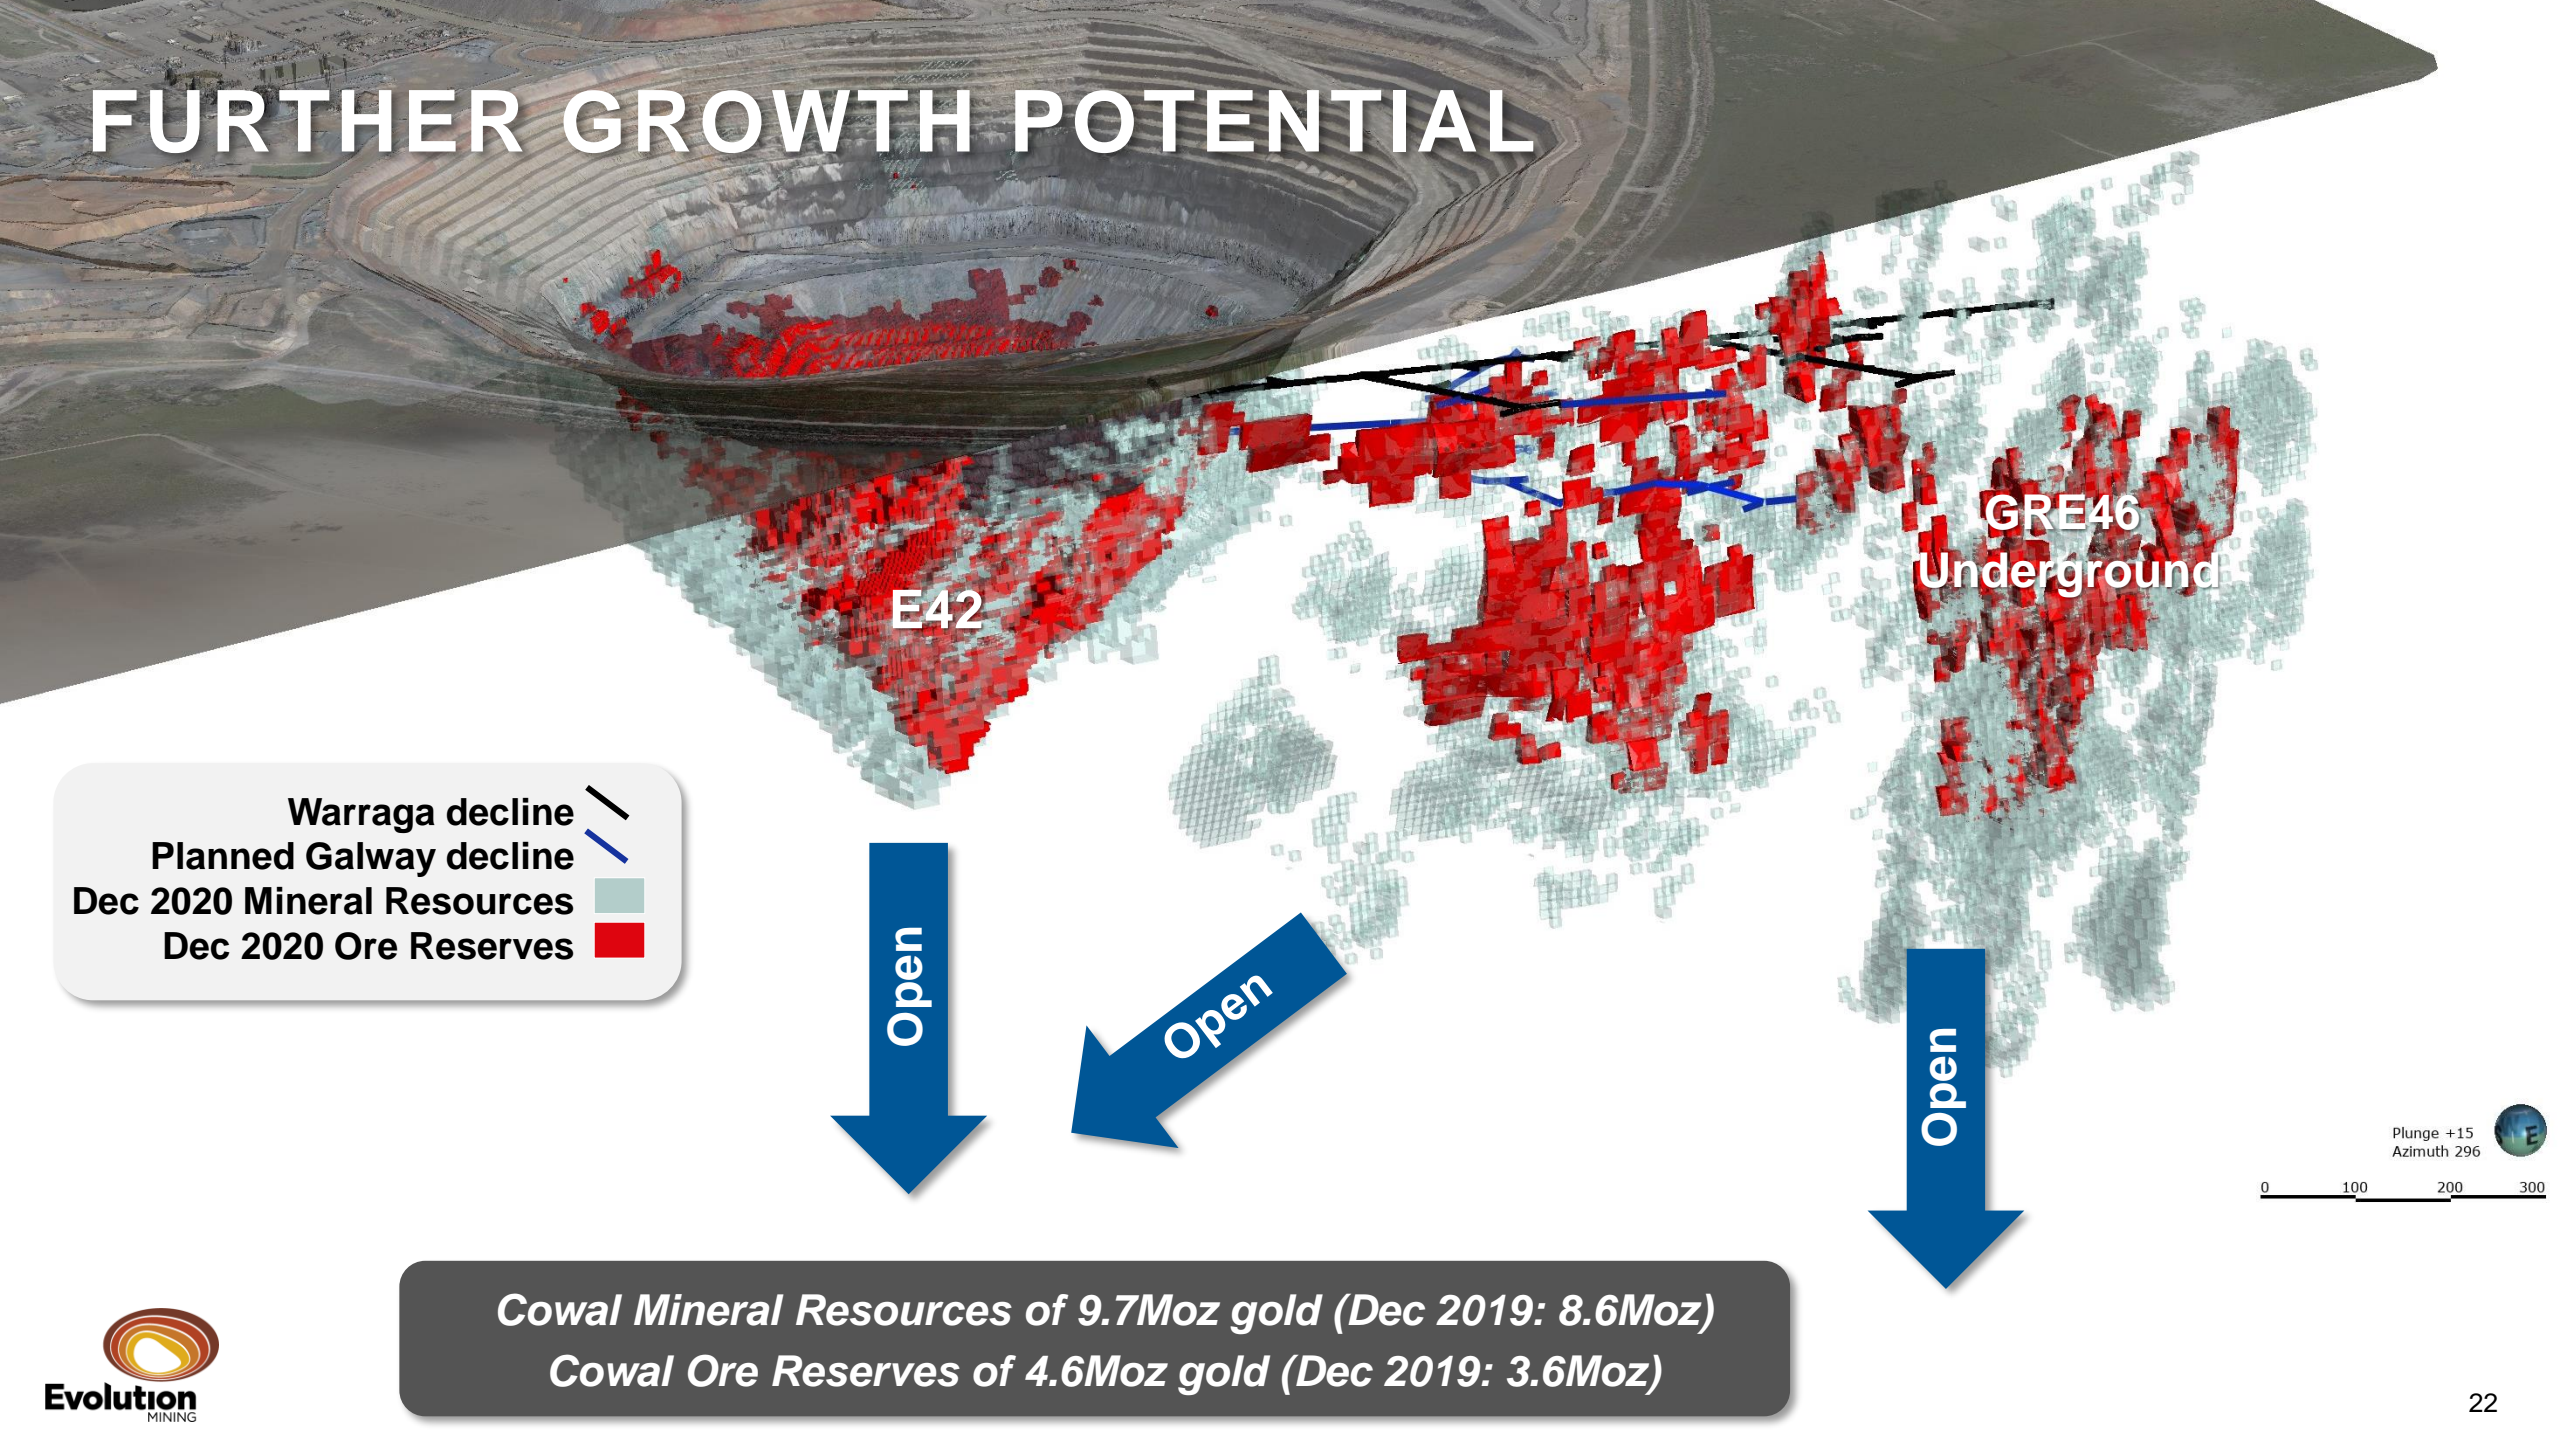

Section of Cowal GRE46 underground area. Orange shows the outline of the December 2018 mineable shape optimiser (MSO) outlines and yellow shows the December 2020 MSO outlines. Planned drilling from the exploration decline is shown in blue

Long projection of the GRE46 structure looking west showing the location of drilling and associated results highlights completed during the December 2020 quarter

GALWAY EXPLORATION DECLINE

- Organic growth enabler
- Establishes next stage of diamond drill platforms to continue strategic drilling program
- Contract awarded to Barminco for development and diamond drilling
- Development commenced February 2021
- Diamond drilling to commence April 2021
- Scope of works
 - 2,300m underground development
 - 12,000m diamond drilling
- Drilling program focus:
 - Confirmation of optimal grade control parameters
 - Conversion of Mineral Resources to Ore Reserves

PROCESS FLOWSHEET

PROCESS EQUIPMENT

Power supplied from NSW Grid – AGL

- Primary crushing: Metso 54-75 Superior MK-II gyratory crusher

Grinding

- FFE 36' x 20.5' SAG mill, FFE 22' x 36.5' ball mill
- Forged steel 125mm balls (SAG), high chrome 80mm balls (ball mill)

Screening

- Schenck Vibrating screens (SAG discharge), Delkor Linear (COF)

Recycle crusher

- 2 x Sandvik H6800 hydrocone cone crushers

Mineral liberation/recovery

- Method: flotation, regrind, CIL of concentrate and Float tails
- Equipment: 2 x SK1200 and 10 x OK200TC (flotation), Metso Vertimill (VTM1000WB), 2 x Metso 355kW SMDs, 4,000m³, Pre-Ox, 2 x 4,000m³ and 6 x 1,000m³ CIL tanks; FTL 7 * tank leach circuit with Kemix inter-stage screens and SMBS Cyanide destruct tanks
- Cyanide supply – Orica
- Lime supply – Graymont

Refining

- 10t AARL elution circuit, Regeneration kiln, 4 x Electrowinning cells

Gravity Circuit

- Falcon Concentrator / Acacia Reactor

PLANT PERFORMANCE

Increased plant availability and throughput

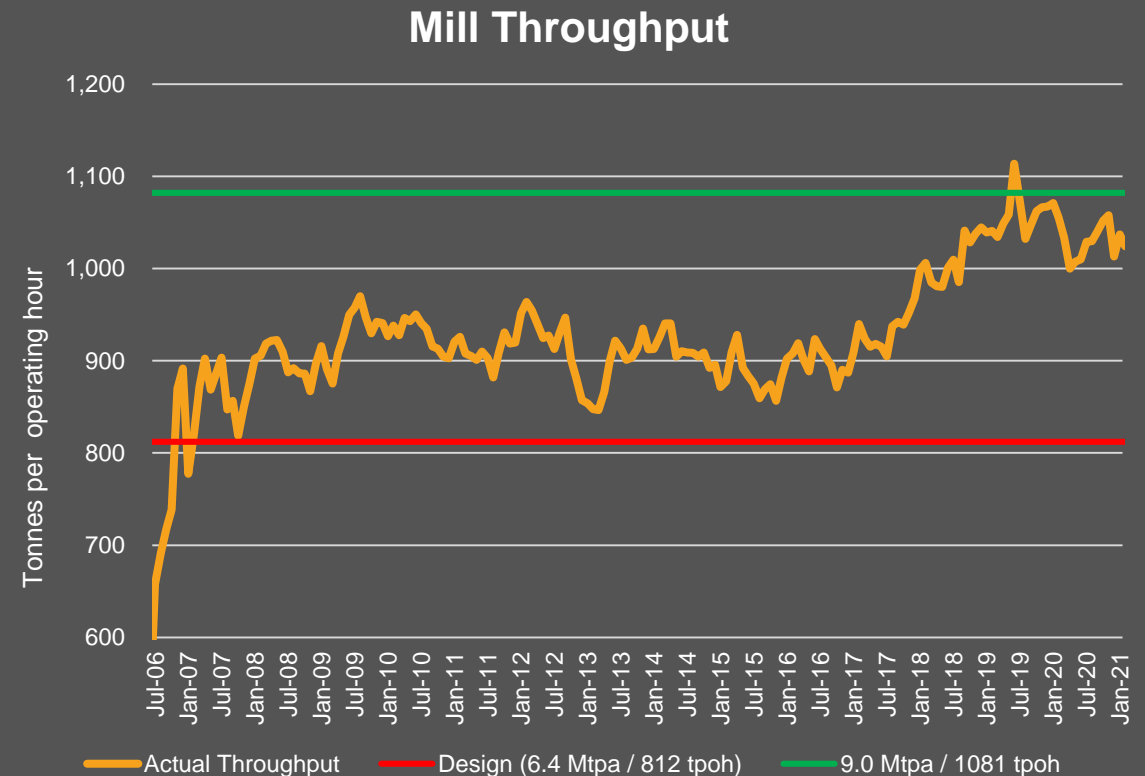

- Twinning of critical pumps completed
- Change from three to six monthly planned major shutdowns

Float Tails Leach benefits being realised

- Blending of high-grade oxide ore feed (+20% of plant feed in FY21)
- Recovery improvement of 2.3% in FY21

Permit to 9.8Mtpa provides long-term optionality

- Near term incremental improvement targeting ~9.0 Mtpa

WATER STRATEGY

Objective: Reduce reliance on fresh water sources

Increase water recycling and reduce water usage

- Increased Integrated Waste Landform decant return capacity
- Tails flocculation trial – engineering study completed
- Tails thickening – Feasibility Study commenced
- Pit dewatering – Concept Study completed

Increase saline water sources

- Completed hydrogeology study within 20km of operation
- Completed duplication of the water pipeline
- Commissioned three new saline bores
- Exploring saline water targets June 2021 quarter

Increase onsite water storage

- Increased capacity by ~15%
- Maintain site storage 900 – 1,050 ML

INNOVATION

Data Analytics

- Remote monitoring and analysis of grinding mill operating data with improvement in grind from p80 – 212 μm to a p80 of 160 μm

Technology Trials – Augmented and Virtual Reality

- HoloLens for maintenance collaboration
- 3D training – fire fighting simulation training

Industry Step Change Technology – GlyCat™

- Technology that uses glycine and cyanide during the cyanidation process of gold ore for potential significant cost savings and environmental benefits
 - Lab trials completed successfully
 - Next phase: pilot plant trial for variability tests and long-term environmental impacts

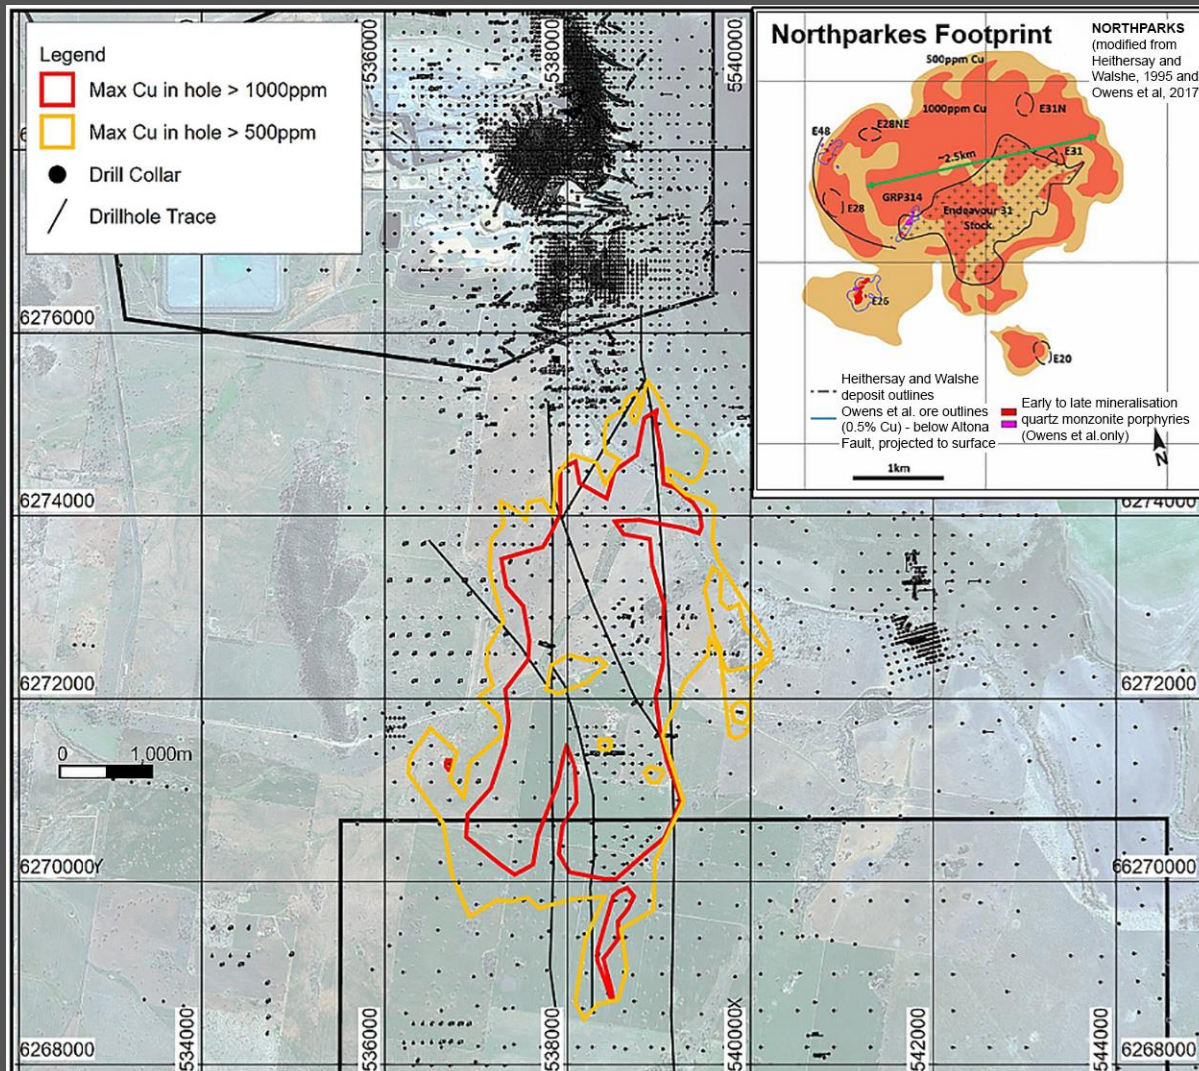

HoloLens mobile maintenance trials in the open pit

Glycat Pilot Plant at the MPS laboratory, Perth

E39 PROSPECT

- 5km south of existing E42 mine
- Large copper anomalous footprint (~5km x 1.5km)
- Historic drilling by Geopeko (1980s) mostly shallow (to top of fresh rock)
- Anomalous copper over long intervals in limited deeper drilling
- Drilling planned for June 2021 quarter testing for potential higher-grade core

**E39D2: 110 – 111m;
Chalcopyrite stringers
in granodiorite**

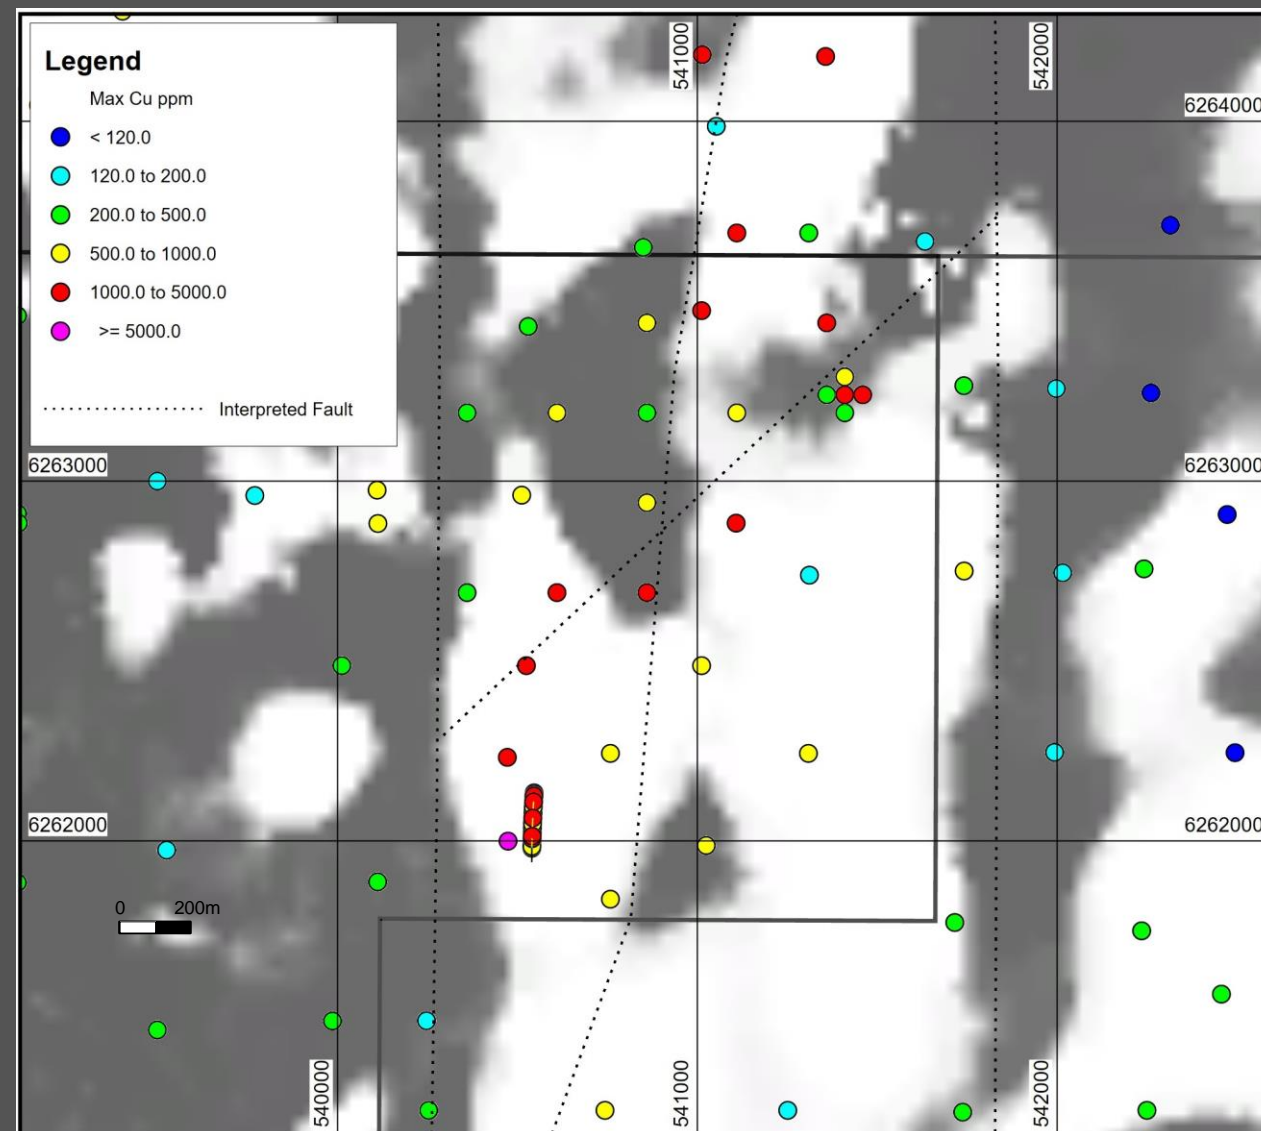

**E39D2: 173-174m;
Disseminated
chalcopyrite in
Granodiorite**

SOUTH COWAL

Data is reported to significant figures to reflect appropriate precision and may not sum precisely due to rounding. Mineral Resources are reported inclusive of Ore Reserves. 'UG' denotes underground.

¹Includes stockpiles ²Ernest Henry Operation cut-off 0.9% CuEq ³Red Lake cut-off is 3.3g/t Au except for Cochenour (3.0g/t Au) and HG Young (3.2g/t Au) deposits

⁴Group Mineral Resources Competent Person (CP) Notes refer to 1. James Biggam; 2. Dean Fredericksen; 3. Brad Daddow; 4. Tim Murphy; 5. Ben Coutts; 6. Jessica Shiels (Glencore)

⁵The Mineral Resource for the Mt Carlton A39 underground deposit has been estimated using a AuEq (g/t) cut-off of 4.4g/t to enable quotation of this silver rich deposit as equivalent gold ounces.

The gold equivalent (AuEq) calculation accounts for silver recoveries determined from metallurgical test work and uses an assumed silver price of A\$26/oz and gold price of A\$2,000/oz as per the below equation.

$AuEq = 26/2,000 * 0.8203 * \text{silver grade} * (\text{Silver price} / \text{Gold price} * \text{silver recovery} * \text{silver grade})$. It is the Competent Persons opinion that the assigned cut-off criteria satisfies the JORC Code requirement that the reported Mineral Resource meets reasonable prospects of eventual economic extraction and that the silver present within the A39 deposit can be economically recovered.

Full details of the Evolution Mineral Resources and Ore Reserves are provided in the report entitled "Annual Mineral Resources and Ore Reserves Statement" released to the ASX on 17 February 2021 and available to view at www.evolutionmining.com.au

Full details of the Ernest Henry Mineral Resources and Ore Reserves are provided in the report entitled "Glencore Resources and Reserves as at 31 December 2020" released 3 February 2021 and available to view at www.glencore.com.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the Reports and that all material assumptions and parameters underpinning the estimates in the Reports continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the Reports. Evolution Mining has an economic interest earning rights to 100% of the revenue from future gold production and 30% of future copper and silver produced from an agreed area, and 49% of future gold, copper and silver produced from the Ernest Henry Resource outside the agreed area. The Ernest Henry Resource is reported here on the basis of economic interest and not the entire mine resource. The above reported figures constitute 77% of the total Ernest Henry gold resource.

¹Includes stockpiles ² Ernest Henry Operation cut-off 0.9% CuEq ³Red Lake cut-off is 4.3g/t Au except for Lower Campbell (4.4g/t Au) and Upper Campbell (2.5g/t Au) deposits

⁴Group Ore Reserve Competent Person (CP) Notes refer to 1. Ryan Kare; 2. Joshua Northfield; 3. Brad Armstrong; 4. Ken Larwood; 5. Thomas Lethbridge; 6. Anton Kruger; 7. Michael Corbett (Glencore)

⁵The Ore Reserve for the Mt Carlton A39 underground deposit has been estimated using a AuEq (g/t) cutoff of 6.1g/t to enable quotation of this silver rich deposit as equivalent gold ounces.

The gold equivalent (AuEq) calculation accounts for silver recoveries determined from metallurgical test work and uses an assumed silver price of A\$20/oz and gold price of A\$1,450/oz as per the below equation.

$AuEq = 20/1,450 \times 0.8203 \times \text{silver grade}$ (Silver price/Gold price * silver recovery * silver grade). It is the Competent Persons opinion that the assigned cut-off criteria meets the minimum acceptable criteria to support economic extraction and that the silver present within the A39 deposit can be economically recovered.

Full details of the Evolution Mineral Resources and Ore Reserves are provided in the report entitled "Annual Mineral Resources and Ore Reserves Statement" released to the ASX on 17 February 2021 and available to view at www.evolutionmining.com.au

Full details of the Ernest Henry Mineral Resources and Ore Reserves are provided in the report entitled "Glencore Resources and Reserves as at 31 December 2020" released 3 February 2021 and available to view at www.glencore.com.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the Reports and that all material assumptions and parameters underpinning the estimates in the Reports continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the Reports. Evolution Mining has an economic interest earning rights to 100% of the revenue from future gold production and 30% of future copper and silver produced from an agreed area, and 49% of future gold, copper and silver produced from the Ernest Henry Resource outside the agreed area. The Ernest Henry Resource is reported here on the basis of economic interest and not the entire mine resource. The above reported figures constitute 86% of the total Ernest Henry gold reserve.

Data is reported to significant figures and differences may occur due to rounding. Mineral Resources are reported inclusive of Ore Reserves. The Cowal Mineral Resource Competent Person is James Biggam, Ore Reserve open pit Competent Person is Ryan Kare and the Ore Reserve underground Competent Person is Joshua Northfield

The underground Mineral Resource has a 1.5g/t cut-off grade and all open pit Mineral Resources have a 0.35g/t cut-off

The resource and reserve totals are extracted from the ASX release entitled "Annual Mineral Resources and Ore Reserves Statement" released to the ASX on 17 February 2021. Evolution confirms that that it is not aware of any new information or data that materially affects the information included in that release and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcement.
