

COWAL GOLD PROJECT  
ADDENDUM TO CYANIDE MANAGEMENT PLAN

AUGUST 2007  
Project No. HAL-02-07/1/25  
Document No. AD-CMP-B  
ID: 685098

## **ADDENDUM Cyanide Management Plan**

**1. Replace Section 6.2.3.1 on page 18 with:**

In accordance with Consent Condition 8.2(b)(iii) which requires provision of an on-site laboratory for quickly establishing  $CN_{WAD}$  levels in the liquid at the discharge point to the tailings dams and in the decant ponds for monitoring purposes,  $CN_{WAD}$  samples collected twice daily in accordance with the US EPA (1999) Method OIA-1677 at the discharge point to the tailings storages and in the decant water of the tailings storages will be analysed at the on-site laboratory. The samples will be analysed for  $CN_{WAD}$  in the on-site laboratory using Picric Acid Colorimetric determination (or any other method considered appropriate in consultation with the Department of Primary Industries – Mineral Resources, the Department of Environment and Climate Change and the Director-General for Planning). The results of the on-site analysis will be verified by the off-site laboratory analysis set out in Section 6.2.3.2.

**2. Delete paragraph 5 of Section 6.4 on page 20:**

Regular water quality sampling of the water collected in the seepage cut-off drain will also be conducted and analysed for  $CN_{WAD}$  levels.
