Inspired people creating a premier global gold company

Evolution Mining
FORWARD LOOKING STATEMENT

These materials prepared by Evolution Mining Limited ("Evolution" or "the Company") include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company's control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.

INFORMATION ON PRODUCTION TARGETS AND FORECAST FINANCIALS

For information on Production Targets and Forecast Financials, Refer to the ASX release titled “Business Update” dated 27 June 2022 available to view at www.evolutionmining.com.au. The Company confirms that all material assumptions underpinning the production targets and forecast financial information derived from the production targets in the 27 June 2022 release continue to apply and have not materially changed.

This presentation has been approved for release by Evolution’s Executive Chair, Jake Klein.

**GOLD PRODUCTION (koz)**

- FY22 Actual: ~640
- FY23 Guidance: 720 (+/-5%)
- FY24 Outlook: 800 (+/-5%)

² Based on share price of $2.64 per share on 29 July 2022
³ See the Appendix for information on Evolution’s Mineral Resources and Ore Reserves
³ AISC is based on Gold price of A$2,400/oz (royalties) and Copper price of A$12,500/t (By-product credits)
SUSTAINABILITY

- Shared value of health and safety
- Safeguard our social licence to operate
- Committed to our ‘Net Zero’ target and supporting our local communities:
  - Convert Mt Rawdon open pit into a 1-2GW Pumped Hydro generator
  - Feasibility Study to be completed in FY23
  - Significant new renewable energy source to support Queensland’s renewable energy targets
  - Continuing asset in the community after mining ends

Mt Rawdon Pumped Hydro Project – more information at https://mtrawdonhydro.com.au/
$1.9B total cost to acquire the asset
- Returned over $1.5B of net mine cash flow
- Gold equivalent production ~350,000 ounces per annum\(^1\)
- Mineral Resource\(^2\) updated with ~30km of new drilling
  - 28% increase in Copper to 1.13 million tonnes
  - 24% increase in Gold to 2.07 million ounces
- Resource categories upgraded
- New Resource model to inform the mine extension PFS
- Mine extension provides pathway to mine life of 2031+
- Mineral Resource equivalent to 7.7 million ounces of gold\(^1\)
- Mineralisation intersected 300m below the PFS window and remains open at depth

---

1. Gold equivalent production and gold equivalent Mineral Resource calculated using gold price of A$2,500/oz and copper price of A$12,500/t
2. See the Appendix for further information on the Ernest Henry Mineral Resource estimate
**RED LAKE TRANSFORMATION**

- Significant Mineral Resource of 12 million ounces
- Campbell and Red Lake plants at record throughput rates
- An expanded Bateman plant increases overall processing capacity to 2Mtpa
- Mining transformation the key to unlocking value
  - Development rates now maintained above 1,200m/mth
  - Reduced stope cycle times increased mining rate to ~1Mtpa
  - Grade increasing as stope dilution improves
- FY23 guidance ~160,000 ounces – ~40% higher than FY22
- FY24 outlook ~200,000 ounces – 25% higher than FY23
- CYD decline will provide access to a new mine in Upper Campbell
  - First stope ore to be mined this quarter
COWAL

- Acquired for A$694M¹ in 2015
- Returned $841M in net mine cash flow
- Mine life extended from 2024 to 2040
- $380M new underground mine on schedule and budget
  - All material contracts now awarded
  - Cost inflation has been within contingency levels
  - First stope ore in June quarter FY23
  - Grade of stope tonnes ~2.3g/t Au during ramp-up
- Stage H ore tonnes and grade increasing as planned
- Production to increase by ~40% over next two years
  - FY23: Up ~20% to ~275,000oz
  - FY24: Up ~15% to ~320,000oz (from FY23)

¹. See announcement “Transformational Acquisition of Cowal Gold Mine and Announcement of Pro Rate Entitlement offer to raise A$248M” on 25 May 2015 and available to view on our website
- District now consolidated for the first time
- Kundana assets delivering higher grade ore
- Integration into “One Mungari” providing operational flexibility
- Plant expansion a logical and value accretive growth option
- Remain committed to complete Feasibility Study by December 2022
1 The Group Gold Mineral Resources are reported as at 31 December 2021 and therefore exclude an additional 405koz in the interim Ernest Henry Mineral Resource update which was depleted to 30 June 2022 (reported on 1 August 2022)

DISCOVERY

COST OF ADDING MINERAL RESOURCES

$35-40/oz

FY23 EXPLORATION BUDGET $62M

COST OF ADDING ORE RESERVES

Data is reported to significant figures to reflect appropriate precision and may not sum precisely due to rounding.

Mineral Resources are reported inclusive of Ore Reserves.

1. Includes stockpiles
2. Ernest Henry Mineral Resource is reported within an interpreted 0.7% Cu mineralised envelope and is depleted until 30 June 2022. The reported Mineral Resource meets reasonable prospects of economic extraction taking into account both the copper and gold component of the reported Mineral Resource. The gold only component listed here is for presentation purposes only and represents the amount of insitu gold contained within the reported Mineral Resource
3. Red Lake Mineral Resource cut-off is 3.3g/t Au except for Cochenour (3.0g/t Au) and HG Young (3.2g/t Au) deposit
4. Mungari Underground Mineral Resource cut-offs vary from 1.56g/t Au to 2.61g/t Au per deposit. The average underground cut-off is 1.8g/t Au. The Mungari Mineral Resource estimate excludes the Falcon deposit (142koz) held by the East Kundana Joint Venture (Evolution Mining 51%, Tribune Resources Ltd 38.75% and Rand Mining (12.25%). Information on the Falcon deposit is provided in Northern Star Resources ASX release titled ‘Strong Growth in Reserves and Resources’ dated 3 May 2021 and available to view at www.narTd.com

This information is extracted from the releases titled ‘Annual Mineral Resources and Ore Reserves Statement’ dated 16 February 2022 and ‘Material Increase in Ernest Henry Resource’ dated 1 August 2022 and are available to view at www.evolutionmining.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the release and that all material assumptions and parameters underpinning the estimates in the release continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons’ findings are presented have not been materially modified from the releases.
